

Context-aware vulnerability detection with code representations

This is a fictional demonstration record, not an academic publication. No real authors, publication dates, measured statistics, quotations, or DOIs are claimed.

RESEARCH OBJECTIVE

Explore how contextual code representations support vulnerability detection.

EVALUATION CONTEXT

Benchmark-based vulnerability detection

ILLUSTRATIVE CONNECTIONS

Vulnerability Detection / Software Security / CodeBERT / Devign / Improved Accuracy / Better Context Understanding / Limited Language Diversity / Dataset Bias

HOW THIS DEMO WORKS

Upload this file with the other demo PDFs to SILAH. The prototype recognizes the fixture filename and loads predefined structured metadata. It does not extract or analyze PDF text. Potential opportunities apply only to this fictional collection.
