

Learning vulnerability patterns from program graphs

This is a fictional demonstration record, not an academic publication. No real authors, publication dates, measured statistics, quotations, or DOIs are claimed.

RESEARCH OBJECTIVE

Explore structural program representations for detecting vulnerable code.

EVALUATION CONTEXT

Common vulnerability benchmark

ILLUSTRATIVE CONNECTIONS

Vulnerability Detection / Program Analysis / Graph Neural Networks / Juliet / Improved Accuracy / Limited Language Diversity / Small Evaluation Scope

HOW THIS DEMO WORKS

Upload this file with the other demo PDFs to SILAH. The prototype recognizes the fixture filename and loads predefined structured metadata. It does not extract or analyze PDF text. Potential opportunities apply only to this fictional collection.
