

Combining static analysis with learned code features

This is a fictional demonstration record, not an academic publication. No real authors, publication dates, measured statistics, quotations, or DOIs are claimed.

RESEARCH OBJECTIVE

Explore whether learned features complement static analysis signals.

EVALUATION CONTEXT

Weakness-focused benchmark evaluation

ILLUSTRATIVE CONNECTIONS

Program Analysis / Software Security / CodeBERT / Static Analysis / CWE-related datasets / Reduced False Positives / Limited Language Diversity / Limited Real-world Validation

HOW THIS DEMO WORKS

Upload this file with the other demo PDFs to SILAH. The prototype recognizes the fixture filename and loads predefined structured metadata. It does not extract or analyze PDF text. Potential opportunities apply only to this fictional collection.
